BREAKING NEWS

Concrete Canvas Press Release – 'EUROBENT PRESS RELEASE MISLEADING - PRELIMINARY INJUNCTION STILL IN FORCE - IT REMAINS ILLEGAL FOR EUROBENT TO MANUFACTURE TILTEX IN POLAND.'
https://cloud.excelplas.com/s/axaHmH1JscKQkL5#pdfviewer

Concrete Canvas Technology Ltd. wishes to clarify that the below are and remain matters of fact:

1. **A Preliminary Injunction, granted by the Regional Court of Legnica in Poland, that prohibits Eurobent from manufacturing, offering, importing and putting Tiltex™ on the market is in force in Poland. It remains in force.**
   https://www.concretecanvas.com/hundreds-of-tiltex-rolls-seized-in-raid-on-eurobent-factory/

   IT IS ILLEGAL FOR EUROBENT TO MANUFACTURE TILTEX IN POLAND

2. **?Eurobent has appealed the Preliminary Injunction granted by the Legnica court on three occasions; all have been unsuccessful.**
3. **The Court in Legnica is the Polish court seized with determining the merits of the patent infringement action instituted in 2018 by Concrete Canvas against Eurobent in Poland. That action is live and pending before the Courts.**
4. **Concrete Canvas Technology Ltd. has enforcement proceedings pending in the**

Polish Courts in ?widnica for wilful violation by Eurobent of the preliminary injunction in Legnica including substantial evidence of the manufacture of Tiltex™, in clear breach of the preliminary injunction, seized in a raid by court bailiffs on Eurobent's factory.

The Regional Court of Warsaw was seized only in respect of supplemental preliminary injunction proceedings which were brought by Concrete Canvas to restrain the export of Tiltex™ from Poland. The original motion for an additional preliminary injunction to restrain acts of export from Poland was initially granted by the court of first instance in Warsaw. Whilst the Regional Court in Warsaw has now reversed the order of the court of first instance no written grounds upon which the decision was granted have been made available**. It is false and misleading for Eurobent draw any conclusions on the underlying merits of Concrete Canvas's claim.** To reiterate, neither the status nor the merits of the pending patent infringement action, or the preliminary injunction of the Legnica court, are impacted in any way by this decision.

The enforcement proceedings before the District Court in ?widnica are also unaffected by the decision of the Regional Court in Warsaw**. It remains illegal for Eurobent to manufacture or distribute Tiltex in Poland** and the fine, among the highest ever determined for a case of this type, for breaching the court order remains in force.

Stay Up to Date with the Latest Geosynthetic News by Signing Up for the GNA Newsletter!
https://www.geosyntheticnews.com.au/subscribe/

• GNA now has +30,000 views per month
• Articles published on GNA get thousands of views and are distributed widely through 3rd Party Affiliates
• GNA is now the most read source of Breaking News on Geosynthetics Worldwide
• Since GNA is published up to 12 times per month, no other source of Geosynthetic Industry News comes close to being as current and up-to-date
• In 2017 we have increased readership by 10,000+ though India, Africa and Asia
• Special Advertising Packages Available for Geosynthetic Manufacturers, Installers, and Service Providers.

ExcelPlas Geosynthetics Testing Expands Geosynthetic Testing Offerings
ExcelPlas now performs more than 120 standard geosynthetic tests in accordance with relevant ASTM, GRI and ISO standards.
We have extensive experience with all types of geosynthetics - from geomembranes (HDPE, LLDPE, fPP), geotextiles to geonets, geogrids, geocomposites and and geosynthetic clay liners (GCLs).
As a Nationally Accredited Testing Laboratory, our technicians, equipment and quality system are monitored regularly for proficiency and compliance assuring that you can count on quality results every time.

Geosynthetic News Alerts - Your Global Source of Geosynthetic News and Technology. Current and Updated!
http://www.geosyntheticnews.com.au

Among GNA's objectives are:

- To promote and educate on the development of specifications and practices that help ensure the proper use of geosynthetics.
- To locate, interpret and disseminate new scientific research to manufacturers and users of geosynthetic materials.
- To enhance the knowledge and awareness of contemporary geosynthetic technologies amongst specifiers, users and installers.

GNA – World’s Leading Source of Breaking News on Geomembranes, Geotextiles and other Geosynthetics

This Newsletter is brought to you by ExcelPlas Labs Australia’s Largest group of Geosynthetics Testing Labs.
