Editors Comment

With the Australian mining industry in decline, water and waste water industries are providing new opportunities for Geosynthetic Manufacturers and Distributors in Australia from lining massive Crystal Lagoons to lining Algae ponds for waste water treatment and the lining of channels and water catchments. As part of this increasing opportunity Melbourne is hosting two major water conferences in May with Trade Exhibitions hosting water authorities and liner companies.

This Newsletter is Brought to you by ExcelPlas Labs – Australia's Largest NATA Accredited Geosynthetics Testing Labs.

ExcelPlas is Australia's leading laboratory for testing geosynthetic materials and was the first laboratory here to be NATA accredited for many geosynthetic tests. Excelplas holds accreditation to ISO 17025 for an extensive range of geosynthetic tests, and offers opinions and interpretations not just test results.

Geosynthetic News Australia (GNA) is now Australia's most current and comprehensive source of news on Geomembranes and other Geosynthetics;

GNA is now sent to over 6500 Geosynthetic Industry Members every week.

Any news or subscription requests for GNA should be sent to john@excelplas.com
