Concrete Canvas Providing Technical Support Engineer for Oceania Region
Concrete Canvas, the leader in GCCM (Geosynthetic Composite Cementitious Mat) technology is now providing a resource dedicated to the education, technical support, specification assistance and installation training of GCCM products to engineering firms and local authorities throughout Australia, New Zealand, Papua New Guinea, New Caledonia and the rest of the Pacific Region.
For more information or advice on the suitability of GCCM's for your project, contact Regional

Technical Manager: Nick Kastoumis on +61 406 682 351, nick.kastoumis@concretecanvas.com

ExcelPlas Labs Providing a Comprehensive Range of Tests on Geosynthetic Clay Liners (GCL) including:

•Tensile strength of GCLs to ASTM D6768
•Peel strength to ASTM D6496
•Mass per unit area to ASTM D5993
•Moisture content to ASTM D4643
•Swell index of clay component of GCL to ASTM D5890
•Fluid loss of clay component of GCL to ASTM D5891

This Newsletter is Brought to you by ExcelPlas Labs – Australia's Largest NATA Accredited Geosynthetics Testing Labs.

ExcelPlas is Australia's leading laboratory for testing geosynthetic materials and was the first laboratory here to be NATA accredited for many geosynthetic tests. Excelplas holds accreditation to ISO 17025 for an extensive range of geosynthetic tests, and offers opinions and interpretations not just test results.

Geosynthetic News Australia (GNA) is now Australia's most current and comprehensive source of news on Geomembranes and other Geosynthetics;

GNA is now sent to over 6500 Geosynthetic Industry Members every week.

Any news or subscription requests for GNA should be sent to john@excelplas.com
