Webinar Today on Predicting Longevity of Covered and Exposed Geosynthetics (Breaking News)
http://geosyntheticsmagazine.com/2017/06/12/gsi-offers-webinar-on-predicting-longevity-of-covered-and-exposed-geosynthetics/

The Geosynthetic Institute (GSI) will offer a webinar on "Lifetime Predictions of Covered and Exposed Geosynthetics," on June 14, 2017, from 11:30 a.m. to 1 p.m. EDT.
A most frequently asked question regarding all types of geosynthetics is, “How long will they last?” This webinar answers the question for exposed geotextiles and geomembranes assuming that they were properly designed and installed. It also compares these new results to earlier lifetime prediction results on a covered geomembrane. Webinar participants will learn about lifetime prediction methods for polymers, the methodology with respect to geosynthetics, the nonexposed half-life of HDPE geomembranes, that the lifetime of nonexposed geosynthetics are generally far greater than typical civil engineering applications and other components, and the lifetimes of 19 different geosynthetics under simulated exposed conditions.

"GNA Promoting the Use and Development of Geosynthetic Technology Globally"

? Geosynthetic News Alerts - Your Global Source of Geosynthetic News and Technology. Current and Updated!
http://www.geosyntheticnews.com.au

Among GNA's objectives are:

- To promote and educate on the development of specifications and practices that help ensure the proper use of geosynthetics.
- To locate, interpret and disseminate new scientific research to manufacturers and users of geosynthetic materials.
- To enhance the knowledge and awareness of contemporary geosynthetic technologies amongst specifiers, users and installers.
