Senversa’s Geosynthetic Liner Expert to Present on Geosynthetic Containment as a Contaminated Soil Remediation Solution

- Tuesday, **February 20, 2018** at Allens, Level 37, 250 St Georges Terrace, Perth,

Western Australia.

- Aaron O'Malley is a Principal at Senversa's Perth Office, with over 15 years of engineering experience across Western Australia, South Australia and various Australian states. Aaron has specialist experience in the design and construction of geosynthetic and compacted clay liners for baseliner and capping systems for a range of waste and storage containment facilities including landfill cells, mining facilities, leachate, stormwater and residue ponds.

- GNA now has +30,000 views per month
- Articles published on GNA get thousands of views and are distributed widely through 3rd Party Affiliates
- GNA is now the most read source of Breaking News on Geosynthetics Worldwide
- Since GNA is published up to 12 times per month, no other source of Geosynthetic Industry News comes close to being as current and up-to-date
- In 2017 we have increased readership by 10,000+ though India, Africa and Asia
- Special Advertising Packages Available for Geosynthetic Manufacturers, Installers, and Service Providers.

ExcelPlas Geosynthetics Testing Expands Geosynthetic Testing Offerings

ExcelPlas now performs more than 120 standard geosynthetic tests in accordance with relevant ASTM, GRI and ISO standards.

We have extensive experience with all types of geosynthetics - from geomembranes (HDPE, LLDPE, fPP), geotextiles to geonets, geogrids, geocomposites and and geosynthetic clay liners (GCLs).

As a Nationally Accredited Testing Laboratory, our technicians, equipment and quality system are monitored regularly for proficiency and compliance assuring that you can count on quality results every time.

Among GNA's objectives are:

- To promote and educate on the development of specifications and practices that help ensure the proper use of geosynthetics.
- To locate, interpret and disseminate new scientific research to manufacturers and users of geosynthetic materials.
- To enhance the knowledge and awareness of contemporary geosynthetic technologies amongst specifiers, users and installers.
